Mobility Partner Programme - Special offer with Lufthansa – discounted travel for patients.

Lufthansa German Airlines offers a comprehensive global route network linking India with major cities around the world. Lufthansa is proud to partner with Apollo Hospitals, to provide patients and their travel companions with special prices and services that meet their needs. As the mobility partner for patients undergoing medical procedures with Apollo Hospitals, Lufthansa offers special prices and flexible conditions in First, Business or Economy Class to patients and their travel companions.

Flight booking for International patients:

Once you have booked a medical procedure with Apollo Hospitals, you will be provided with a code that gives you access to Lufthansa's dedicated online booking platform. To make a reservation, please enter your access code in the input field titled "Access to Event Booking" on the right hand column of the following website: **www.lufthansa.com/healthcare**. Once you have selected your destination and preferred dates of travel, the reduced fares and conditions are shown automatically, as are any lower promotional fares which may also be available.

Advantages of the Global Healthcare Mobility Partner Program for International patients on Lufthansa

- You and your travel companion receive reduced fares together with special conditions in Economy, Business or First Class.
- The flexibility to mix your class of travel according to your comfort needs – for example, you can travel in Business Class in one direction and Economy Class in the other direction.
- The option of booking these special fares online, quickly and easily. You can earn valuable miles with Miles & More or the bonus program of our partner airlines.
- Enjoy Lufthansa's excellent service and the best possible connections to over 200 international destinations in nearly 80 countries thanks to our global network.

Please note the following:

You must permanently allow "pop-ups" in your browser otherwise the booking platform window will not open.
