

AORTIC CONCLAVE-2024

Date: Saturday, 24th August 2024

Venue: ITC Grand Chola, Guindy, Chennai

Aortic diseases are a growing concern in India, with the incidence of aortic aneurysms and dissections increasing by 10-15% annually. This alarming trend underscores the importance of advancing our understanding and treatment of these complex conditions.

At Apollo Hospitals, we have been at the forefront of addressing this challenge through the performance of numerous complex aortic procedures, including aortic root repair and replacement, ascending aorta and arch repair, and replacements in both acute dissection settings and chronic aneurysm repair. Our commitment to excellence has yielded outstanding outcomes over the years, culminating in the establishment of the Institute of Aortic Aneurysm and Dissection Surgery at Apollo Hospitals, Greams Road, Chennai, in October 2022.

Key highlights of this year's conclave includes discussions on the latest advancements in genetic markers for aortic diseases. Understanding these markers can lead to early detection and personalized treatment plans, revolutionizing patient care in this specialized field.

We are honoured to host esteemed faculty from around the globe, who will share their expertise and insights during this one-day conference. This event aims to enhance awareness of aortic diseases and foster academic growth, providing attendees with the latest updates and knowledge.

We look forward to your participation in making the 3rd Apollo Aortic Conclave a milestone event in the field of aortic disease research and treatment.
